Sustainable Meetings and Conferences

Dialogue on Science

Method of learning, knowledge transfer and implementation:

The ideas and insights resulting from presentations, workshops and discussions during the conference should be transferable and manageable.

- Collect individual understanding,
- create collective intelligence ...
- for a productive dialogue and a successful implementation

Steps of the DBC®Sokrates Method:

- 1. Gather the mentioned preconditions
- 2. Arrange them into a system map
- 3. Look out for resources or bottlenecks
- 4. Detect hidden connections
- 5. Find knowledge gaps
- 6. Get a strong decision base to test ideas, strategies and actions
- 7. Use the decision base to actively control the achievement of objectives.
